

Don't wait to detect breast cancer, prevent it!

What Every Woman Needs to Know About Breast Cancer Prevention and Early Detection

Please join us for an enlightening and educational seminar about breast cancer prevention and early detection. With so much focus being placed on finding a cure for breast cancer, we've overlooked the obvious; PREVENTION.

Please don't miss this life changing seminar where you'll learn...

- *Mammograms...Are they really safe and effective?*
- *What the doctors aren't telling us and why*
- *What's causing the increase in breast cancer...Do you know?*
- *Can we really prevent ever getting it in the first place?*
- *Common myths about breast cancer...Do you know the truth?*
- *How early can breast cancer be detected?*
- *And much more!*

It's time we stop crossing our fingers and hoping "it doesn't happen to me!" Take control of your health. Come learn about the earliest possible detection and how you can possibly prevent breast cancer. Please don't miss this potentially life saving seminar!

Speaker

Testimonials

The information was excellent. Very informative. Every woman should see this program.

-A. Serrano

Fascinating information that inspires me to become more active in demanding that our healthcare system adopt an approach towards prevention.

-S. Renick
